5 sources

The provided text is an excerpt from a YouTube video transcript. The video, titled "How to Make FLAPPY BIRD with React Native in 1 Hour - Game Development Full Course 🐦", comes from the "SimCoder" channel. This source focuses on a tutorial demonstrating the process of creating the game Flappy Bird using React Native, all within a one-hour timeframe, aiming to provide a comprehensive guide to game development.

how do i start

Based on the source provided, if you are asking "how to start" making **Flappy Bird with React Native**, the given source describes a YouTube video titled "**How to Make FLAPPY BIRD with React Native in 1 Hour - Game Development Full Course 🐦**".

This indicates that the video itself is designed as a **full course** to guide you through the process of developing the Flappy Bird game using React Native, all within an hour. Therefore, to "start," you would typically begin by watching and following the instructions presented in this specific video course.

The provided excerpt from the YouTube source is the title of the video, which outlines the topic and the scope of the course. It does not contain the step-by-step instructions on *how* to make the game; rather, it identifies the resource that provides those instructions. To get started with the actual development, you would need to access and engage with the content of the full video course.
